PROJECTS

TECH-BLOG

This Model-View-Controller (MVC) Tech Blog application allows users to create an account and post blog posts. Users can also edit and delete their own posts. It also allows them to comment on posts from other users.

https://github.com/kusalaindika1/my-tech-blog

WEATHER-APP

Weather-Dashboard is an application to find a weather condition of a given city both the current and 5-Days forecast at the same time. The server-side API used to get response data object is retrieved from the Open Weather API.

https://github.com/kusalaindika1/weather-dashboard-app

BOOK-SEARCH-ENGINE

This Google Books API search engine application was originally built using the MERN stack, with a React front end, MongoDB database, and Node.js/ Express.js server and API.

https://github.com/kusalaindika1/my-book-search-engine

SOCIAL-NETWORK-API

this is a Social-Network-Api application Build an API for a social network web application where users can share thoughts, react to friends thoughts, & create a friends list.
